

Versatile Products

SLIM FAUCETS

Graff recently presented its collection of faucets, christened Lauren. A full range is offered, comprising three-hole articles for the wash basin, the bathtub and the shower area. The elements are both deck-mounted and wall-mounted and are characterised by sinuous lines and a majestic spout. The gentle curve of the faucet and the slim handles can take on a stronger look when shown in the gold-plated finish. The collection is available in Polished Chrome, Steelnox®, Polished Nickel, Olive Bronze and 24K Gold finishes.

MOSAIC MARBLE

Classic Marble Company (CMC) has introduced its latest Terrazzo products – Forum, Trevi and Elba from its KalingaStone marble collection. Part of the mosaic design range, the new Terrazzo products come in unique designs. While Forum is a lighter marble shade with distinguishing dark chips, Trevi and Elba are both dark marble but with light colour chips embedded in them. Trevi and Elba are different in a way that the chips in Elba are finer and colourful while Trevi is a perfect blend of black and white. Redefined for modern architecture, the Terrazzo collection is a unique offering which combines the exquisiteness of mosaics and the elegance of marble in a slab. The products also feature the characteristics of being less porous, more flexible and harder than natural marble. While all three products are perfectly suited for all marble-based applications, they've been mostly adapted for flooring and wall claddings. Elba especially makes for an effective wall highlighter with its abstract design and can offer a different dimension to the installed space.
