EBCO

Ebco's Pole Shelving System is guaranteed to help you utilize your wardrobe/clothing space wisely. Apt for both homes (in walk-in wardrobes) and for retail outlets, this modern concept is minimalistic in design and is flexible to change. One can assemble, reconfigure and recreate fascinating display options — without actually removing the pole systems installed — with its varied connectors, brackets and accessories (durable and strong aluminium sections and die cast parts). The user can also choose multiple adapter brackets for hanger shelves, cabinets, tilting shelves, etc. as per the desired application. Additionally, the system also offers an optional designer glass shelf with light which can be easily adapted to a display unit.

TTK PRESTIGE

TTK Prestige's latest offering is the Motion Sensor Kitchen Hood. The highlight of this appliance is that it can be controlled with a simple motion of a hand — all one needs to do is wave left to right to switch it on, continue waving right to regulate its speed level and when done wave right to left to switch it off. It comes with a host of features: a powerful 860m³/hr suction capacity, heat-resistant tempered glass, and a three-speed control setting option to reduce energy waste. The cutting edge baffle filter eliminates unhealthy smoke and grease particles, thus keeping the air in the kitchen clean.

GRAFF

Graff's Ceiling Mounted Showerheads is developed in stainless steel to guarantee a long-lasting, high-performing life. These showerheads feature minimal design while satisfying the desire for an immaculate look. These showerheads are available in a rectangular, square and circular shape; and include both rain and mist functions for a fulfilling spa experience replete with natural music of water droplets. The recessed circular shower head is available with or without mist function and is provided with a full spectrum LED chromotherapy. The LED function can be activated and regulated through a remote control. The series is composed of a thermostatic unit, two diverters and a cut-off valve that can be combined into a single compact block.
