

GRAFF® Presents the Iconic LUNA Faucets in Immortal Black And White Finishes

GRAFF®, a company that stands out for its new ideas, unique achievements and exclusive solutions in the faucets field—presents its most inventive faucet collection for the bathroom: 'LUNA'. GRAFF is globally recognized for its capacity to "innovate within tradition" since 1922. Winner of the prestigious Interior Design Best of Year Awards in the Bath section, LUNA's

singular design is supreme not only for its distinctive shape, but also for the mirror-like finish. After expanding its colour palette the LUNA is now available in Polished Chrome, Polished Nickel, Brushed Nickel, Steelnox®, White, Architectural Black and Matte Black finishes. The whole iconic LUNA collection can be viewed on www.graff-designs.com.

Starting from January 2019, the pluri-awarded Luna collection is available in White and Black finishes. The eternal combination of black & white is intended to satisfy the desires of architects and designers that look for a specific impact inside the bathroom and shower areas. The latest collection is aimed for expanding the possibilities of design solutions through this astounding collection of iconic LUNA faucets. The entire collection is enhanced by the remarkable individuality of black and white.

LUNA evokes a celestial form: an element that shines with its ethereal features in the bathroom, showing its perfection, a sinuous element that floats gently on the wall. The Black and White finishes are two of the most resistant finishes among the extremely variegated portfolio offered by GRAFF. Both obtained through a powder coating process, making the products resistant to scratches, chipping, abrasions, corrosion, fading, and other wear issues. Powder coating is tough, it looks great and it lasts a long time.

In addition to being durable, it presents an attractive choice due to environmental advantages. Powder coatings, in fact contain no solvents and therefore emit negligible if any polluting elements into the atmosphere.

Every GRAFF product represents a combination of harmony and functionality: A product with unique qualities strongly grounded on pure design and high standard finishes. Equipped with an aerator, the LUNA faucet has a flow rate of 5 litres per minute with a 3 bar pressure. Available with wall-mounted or deck-mounted handles as a lavatory faucet, the collection also includes an original shower column recalling the curve of the spout.
