

Armchairs from Lyndon's Vernon collection in the lobby of The Cheval Three Quays

## Seating collections

### Lyndon

Whether welcoming visitors to the office, or making guests feel at home upon arrival at a hotel, Lyndon's extensive range of handcrafted seating collections offers the perfect solution to make the right first-time impression in any reception area.

The comfort offered by Lyndon's Sebastian, Olivia, Imogen and Lexe collections continues to make the traditional sofa and lounge chair options a popular specification throughout hotel, hospitality and corporate foyers. Featuring superior timber detailing, combined with a choice of luxury fabrics and leathers, these options are more than capable of providing a striking centrepiece in their own right.

Traditional wing chairs, such as the stately Mr & Mrs, are another popular choice, bringing a striking fireside charm and allure to both traditional and contemporary interiors. Equally, the timeless appeal of Lyndon's popular lounge chair collections such as Vernon, Albany, and Callisto, provide a warm welcome by drawing the sitter into luxurious and reassuring comfort. ## Compact hinge

### Salice

Pacta – a compact hinge for fall flaps which operates without the need for additional stays or cables – is the latest innovation from Salice, premier supplier of furniture fittings. Pacta confers a decelerated opening action and the fall of the door is gradual and controlled.

In the fully-open position, the door and base panel are aligned, creating a uniform and flat surface. Available with Push self-opening system, Pacta comes in a variety of finishes. Its applications are numerous: in living room and kitchen cabinets, to create desks in children's furniture or for writing surfaces and table extensions in hotel furniture.

Boasting a wide product selection, technically advanced design and unique industry expertise, it is easy to see why Salice remains the number one choice for designers, architects and manufacturers keen to incorporate innovative features to differentiate their offering from the competition.

## Finezza Wall-Mounted Faucet Handle

### GRAFF

Unique vision, international design, selected materials and manufacturing tradition: these are the secrets behind Finezza - an Art Deco-inspired line of coordinating shower components and bath accessories, designed for a unified and timeless bathroom suite.

This new line uses bold, geometric shapes juxtaposed with simple, curvilinear motifs to create seamless design style with a progressive vibrancy. The faucet's main body has been developed in a shape that relies on a unique horizontal section, wider at the base and at the top, slimmer in the middle. The spout recalls the design of the body, starting with a trapezoidal section which expands slightly at the end to accommodate the water-saving aerator.

The Finezza Wall-Mounted Lavatory Faucet w/Single Handle is offered in four finishes, including Brushed Nickel, Olive Bronze, Polished Chrome, and Polished Nickel. [graff-faucets.com](http://graff-faucets.com)
