

T&S Brass Releases New Pre-Rinse Unit Design

tsbrass.com

T&S Brass and Bronze Works has unveiled an all-new pre-rinse unit, the T&S DuraPull.

T&S DuraPull's pull-down activation means water begins flowing as soon as the user pulls the sprayer down toward the sink. Automatic shut-off prevents water waste by ending the flow of water when the handle is released, eliminating the spray valve handle and hold-down ring of traditional units.

Equipped with the unique T&S swivel that allows 360-degree rotation of the sprayer, the T&S DuraPull's design reduces operator fatigue and stress on the hose that is common with traditional pre-rinse units.

The 1.07 gpm sprayer is compliant with newly effective Department of Energy regulations, and T&S DuraPull is available in a variety of configurations for deck- or wall-mount installations.

GRAFF Introduces New Harley Faucet Collection

graff-designs.com

GRAFF has unveiled its new Harley Faucet Collection. The design of the contemporary collection was derived from the stylings of classic motorcycles.

The Harley collection includes one, two, or three-hole versions of the sink, bathtub and bidet; wall, floor or deck-mounted models, and a linear lever option, also knurled for a user-friendly handle.
