## Programmable faucets add style

Adding architectural style to restrooms in any building, the HyTronic faucets are offered in a range of styles to meet design and water conservation requirements while also offering improved hygiene. Programming and diagnostics are easier with the Commander Handheld Programming Unit. Facility and maintenance personnel can change and customize operating modes, adjust sensor range, monitor battery levels, identify serial numbers, settings and usage information, access the troubleshooting guide and obtain product information. Models available are: Curve, with a curved spout that

adds a level of sophistication; Traditional a classic style that complements a variety of restroom designs; Contemporary, an uncluttered look in single and multiple faucet applications; Gooseneck, updated with electronic performance, available in deck mount or wall mount; Edge, provides clean, straight lines and polished chrome finish to add a modern flair; and E-Tronic 40, an affordable option for public restrooms. **THE CHICAGO FAUCET COMPANY.**

## Cast iron tubs

The 2173 Spencer cast iron bathtub brings an element of timeless luxury to bathrooms of all sizes. Its unique rectangular shape provides a generous bathing well and deeper soaking experience. Custom exterior color can

be matched with most existing designs. Six clawfoot finishes: Antique bronze, brushed nickel, chrome, polished brass, polished nickel and white. Thick coating of AA grade titanium-based enamel adds durability and resists stains, bacteria and microbes. cUPC approved. **CHEVIOT PRODUCTS, INC.**

## Compact copper-tube cutters

These compact close quarters tubing cutters for copper tube provide the industry's smallest swing radius to access spaces too tight for other cutters.

Offered in 1/2", 3/4" and 1" sizes, the cutters work on type M, L, and K copper. Directional indicators allow users to easily see which way to turn the cutter, which also features a directional grip to assist users during cuts when the area of work is

difficult to see directly. Chrome rollers provide best-in-class rust protection when exposed to water, while wiper holes on the top and bottom of each cutter's housing also allow water to drain from the tool. A 3-piece set comes in a hard case with additional storage for replacement wheels and a reaming pen, so users can keep accessories in one place. **MILWAUKEE TOOL.**

## Outdoor water bottle fillers

Vandal-resistant bottle filling station is perfect for parks, golf courses, fitness trails, college campuses, or anywhere people need access to filtered water outdoors, even near beaches. Constructed of heavy-duty type 304 stainless steel, its intuitive design features simple pushbutton or optional infrared operation. Sanitary recessed filler spout provides quick, 1-gallon-per-minute fill rate. One-piece fully-welded construction: Standard heavy-duty 14-gauge main column and 11-gauge flange; optional marine-grade type 316 stainless steel for installations near salt water. Has replaceable in-line charcoal filter and is available as a single bottle filler, bottle filler plus water fountain, or bottle filler plus water fountain and child-height water fountain. **WILLOUGHBY INDUSTRIES.**

## High-flow classic waste & overflow

The AB&A Classic high-flow waste and overflow provides additional value to the homeowner. High-flow capacity Classic overflow cover plate is slotted to provide greater drainage through the tub overflow — twice the rate of most commercially available overflows. Easy to install without tools. A test kit is included in every rough-in, half or full kit. Offered in the following kits: full, half, rough-in, trim, finish and press-in. Also, all Classic kits now include an additional gasket to be used on thick-walled tubs. **IPS CORPORATION.**

## Modular shower system

The MSeries concealed modular system for the shower, comprised of an assortment of trim plates, a thermostatic module valve, two diverter valves, and a stop/volume valve, was designed to simplify installation while also offering a customizable shower. The installer has the option to arrange diverters and stop/volume valves in different combinations to satisfy a variety of applications. Each piece can be aligned behind the wall in a single stacked valve. The system accommodates up to seven functions with four different handles. Separate round and square trim plates are available, as well as one combined plate, with seven contemporary finishes available. **GRAFF.**
