

NEW AGE BATHROOMS

Bathrooms of the future are anything but boring. Technology has taken them to a whole new level. Let's take you through some top of the line, functional and stylish bathroom products that will enhance the look of your private space.

GRAFF
AMETIS RING SHOWER
Graff's Ametis Ring is a simple but refined object manufactured in steel. It is a perfect ode to technology and design. It uses a full spectrum LED RGB colour therapy lighting system with 6 colours. The showerhead main body is hollow and internally designed to let the rainfall flow at a particular angle. The user can easily switch from the rain effect to the waterfall jet.

VITRA **MINERCAST WASHBASINS**

Infinity by Vitra brings cast mineral technology into the bathrooms that introduces slim rims and sharp lines. Composed of 80% natural materials, it gains colour as the last layer of resin is spread on it and helps the washbasins retain their brand new look by making them undergo a special process. These basins without overflow holes are perfect for those looking to enhance the style of their bathroom.

GROHE **VERIS F-DIGITAL FAUCETS**

Equipped with wireless technology and push button operation the Veris F-Digital from Grohe is all set to give you a 'smart' bathroom. Buttons on the digital controller let you start or stop the water and adjust the temperature while a dial around the outside helps control the water pressure. An illuminated ring gives you an instant visual feedback of water temperature.

HANSGROHE **SHOWERTABLET** **SELECT 700**

Hansgrohe's ShowerTablet Select is an intelligent thermostat which doesn't allow hot water to enter the thermostat casing and doubles up as an ample storage space in your shower. It works on an innovative 'Select' shut off valve which controls water flow into the shower. With electricity free 'Select' technology and no hot water supply in the thermostat's casing, it offers a carefree shower experience.
