

The Shower 2.0

Forget the old single-faucet shower.
The shower of the future is here, now.

The award-winning design team at GRAFF (not to be confused with the jewelers of the same name) has created one of the most high-tech shower systems on the market. The Aqua-Sense Shower is a full sensory experience. The Electronic System with Ceiling-Mounted Showerhead creates an intense central rainfall. It features an RGB LED color-changing effect controlled by a touch screen, and a USB port and speakers for portable music player connection. The Wall-Mounted Waterfall creates a perfect water blade effect while the Wall-Mounted Cascade and Rainfall Showerhead, with its ultra-slim profile and delicate edges, creates a subtle and well-shaped blade of water resembling an extremely rich rainfall. www.graff-faucets.com ■
