TUMI TEGRA-LITE

tumi.com, 800.299.8864

Tumi has been paving the way in luxury travel gear since 1975, but it was in 2012 that it gained exclusive rights within the travel industry to Tegrin, a revolutionary polypropylene thermoplastic composite material for use in life-saving armor, Nascar race cars, and protective gear for NFL players. Aside from its protective capabilities, the material is extremely lightweight, making the brand's Tegra-Lite collection a favorite among travelers. Tumi continues to push the limits of the materials industry, this year introducing Latitude, its lightest hard-shell luggage line crafted from layered ballistic fibers.

GRAFF AMETIS SHOWER SYSTEM

graff-faucets.com, 800-954-4723

Headquartered in Milwaukee, Wisconsin, Graff is a prime example of American innovation. In 2015, it introduced the award-winning Ametis shower system, which is engineered to offer a soothing halo effect using LED chromatherapy lighting. The LED lighting is positioned within the shower ring to add a new dimension to the column, and balance the user's energy through the colored lighting. The futuristic collection designed by Davide Oppizzi was inspired by the density of water and its colors, the movement of waves, and exquisite Japanese writing.
