BETTER SOLUTIONS

Encraft, recently launched three novel categories in door and window system that are specifically designed for the premium Indian market. The new range has a product line of lift and slide, vertical slider and parallel window.

The EN 142 lift and slide doors comes with frameless side elements and are extra-large in sizes. Perfect installation for balcony, terrace and patio, these doors can be installed easily and are hassle-free. It comes with double-compression seal to protect against draft, dust, water and loss of heat and allows internal glazing from 4mm single to 36mm triple. The EN 77 vertical slider window offers easy operation with great insulation. It is perfect pick for limited window breadth and the EN 12 parallel window offers maximum ventilation and is ideal for staircase, landings and offices.

BALI RETREAT

GRAFF, recently unveiled its Bali collection that features innovative faucets and shower systems. GRAFF uses zero discharge system that recycles 100 per cent of brass and papers for sustainable environment. The range is designed by G+Design Studio. The collection has showers, freestanding elements and wall-mounted solutions. It has a classic faucet with cylindrical shape that resembles the old 1800's water pump. All these products are designed in classic industrial style with polished chrome, antique brushed brass, olive bronze, Steelnox® and antique cooper finish.

NATURAL WONDER

Classic Marble Company, has launched the translucent marble Stone and Luce collection under the flagship brand KalingaStone. Designed on the backdrop of ancient mosaic patterned stone Terrazzo, the Stone and Luce range is luminous and can be backlit to create unique visual affect.

With its translucence feature it allows light to pass through small pieces of stones or chips embedded in the surface. It is available in varied colour options and can be customized as per ones needs. The main features of this range is that it is less porous, more flexible and hard and can be used for interior applications like flooring, walls, table tops, etc, in commercial and residential areas.
