

GRAFF'S STEELNOX

GRAFF's Stealth Lavatory Faucet, is available in Steelnox Satin Nickel, as well as Polished Chrome. Stealth features an abstract shape based upon a conglomeration of geometric angles and planes. The irregular forms captured by the faucet are similar to that of a Cubist painting, suggesting that there is more than meets the eye with this design.

It is defined by its fingerprint resistant coating and paramount performance capabilities. Steelnox protects bathroom fixtures from common wear-and-tear issues, such as chipping and corrosion. The Steelnox is hard, strong and durable making it a must for high-use environments. The processing of a patented powder coating is responsible for the finishes' enhanced performance capabilities, while its satin nickel finish creates visual interest.

Wall-mounted shower system with handshower and showerhead

GRAFF'S SOLAR WITH ITS GEOMETRIC & MINIMALIST COLLECTION

Avant garde design

This contemporary shower stands as the main protagonist in the bathroom and seduces with the purity of its shape. The minimal design consists of a geometrical composition of cubes, rectangles and right angles. Besides the traditional polished chrome and Steelnox® finishes, the version in matte black adds a concrete and substantial look to each item of the Solar collection.
