Polar Lighting Poles From K-Lite

'K-LITE' surface mounted Polar Lighting Pole, integrated with LED Lighting Module is an exclusive choice of designers for city beautification lighting blended with architectural appeal. It is designed for a complete range of contemporary designs with single arm, double arm, L-arm, V-Arm, Square arm and Parallel arm.

The pole is engineered to meet the adverse conditions and the pole sections are duly welded using special grooving techniques and high end MIG/TIG welding process. The control box is integral and built-in with service door, locking arrangement and safety chain. The galvanized pole is coated with epoxy zinc phosphate primer and finished using environmentally stable

polyurethane based paint. The pole is supplied with necessary foundation hardware for normal soil condition.

The Polar Lighting Pole lighting arms are integrated with the LED modular lighting system, which is environmental friendly under green lighting category. The LED lighting offers more lumens with lesser power consumption. The luminaire is IP 68 protected and the various models were evaluated by an extensive research and understanding of illumination requirements for urban spaces.

Graff Presents Solar Collection

Graff, the worldwide manufacturer of innovative faucets, introduces Solar, a new, cutting edge faucet collection. The minimal design consists of a geometrical composition of cubes, rectangles and right angles that align perfectly - both in the opening and closing position. The handles have a rectangular shape that perfectly matches the cubic shape of the body.

Solar offers a very wide range of elements for the bathroom and the shower and is available in the single-lever version as well as the three-hole option. The washbasin and bathtub faucets exist in the deck-mounted and wall mounted versions, while the washbasin and bathtub floor-mounted faucets complete the range of articles with two astonishing elements. The whole collection can be viewed on www.graff-faucets.com.

Solar mono components are equipped with eco-friendly aerators that allow to save water by reducing water flow from 11 to 7 litres per minute. Together with a very functional exposed thermostatic shower, and several wall-mounted and ceiling-mounted showerheads,

the Solar collection includes also the characteristic SKI shower, a wall mounted item with matching levers, four body sprays and a distinctive "ski-like" design.

Besides the traditional polished chrome, this contemporary collection can be produced also in the matt black and matt white finishes, both obtained through a powder coating process, that makes products resistant to scratches, chipping, abrasions, corrosion, fading, and other wear issues.

Grohe Essence - The Greatest Freedom Of Choice

Grohe's expanded Essence collection offers a tremendous variety with 10 possible combinations of deluxe colours and state-of-the-art finishes. Their names are as beautiful as they look: Cool Sunrise, Warm Sunset, Hard Graphite and Nickel.

This new freedom of choice comes with an incredible

consistency in design, with every spout and lever almost identical across all product types. The geometric structure of the design is based on concentric cylinders. For the expanded line it has been slightly softened and humanized. The meticulous attention and dedication to detail redefines purity and modernity in a human way which is sensual yet minimal.

Essence's pre-eminence in every aspect has won numerous prestigious international awards: the Iconic Award Interior Innovation, the Good Design Award, or the iF Product Design Award - just to mention a few. Essence takes bathroom design to a new level and makes it the natural first choice for architects, designers and consumers alike for years to come.
