Zynna Launches Duralee's Debonair Fabrics

Zynna, worldwide famous for its exuberant range of fabrics has recently launched the enthralling Duralee's Fabric Collection. Duralee continually creates palettes and styles with comfort and authenticity, injecting a heavy dose of what's now and what's timely, all the while maintaining a balance with timeless versatility.

Sophisticated, yet youthful and fun, the Duralee design aesthetic upholds an ageless appeal. The collection involves relaxing and decent tones and patterns which is perfect for soft furnishing especially curtains and cushions. This new range

of soothing and blooming upholstery is rich in floral prints and is a perfect choice for those who want to redefine their interior in style and grace.

Mr. Retesh Sharma, MD, Zynna says "Duralee is one of our best selling brands and is widely accepted by our customers. This new range of Fabrics, with blossom prints and patterns promises calm and soft interior inspired by nature and English garden, giving an elegant look to ones' ambience. This collection is very graceful due to floral patterns and is seen quite acceptable by every generation".

Graff Presents Sade, The Expression Of A Unique Design

Graff, the worldwide manufacturer of innovative faucets and shower systems has now come up with their latest Sade collection, the expression of a unique design.

Sade's silhouette is definitely its hallmark and the harmonious movement of the faucet body recalls the natural gush of water, like an old fountain transformed into a stylish and contemporary object. The faucet's spout is not made from a forged brass bar, but from a solid brass block internally emptied. The spout is thicker than normal and gives the entire element more important and a unique sense of proportion. Sade is manufactured in brass, with a very low nickel and lead content, in compliance with all drinking water regulations and the most restrictive criteria required for the protection of health and the environment.

Sade collection derives from the encounter between clean and modern lines with technology and selected materials. The faucet is a real

piece of furniture carrying a contemporary concept and net geometry. The Sade collection provides a comprehensive range of articles both deck and wall mounted, with a single lever or as a widespread set, for the bathroom and for the shower.

New Grotherm Special Thermostat From Grohe

The new Grotherm Special combines the proven qualities of a Grohe thermostat with a number of unique and innovative features. This combination makes it the perfect choice specifically for the elderly as well as for anyone with reduced manual dexterity. Care homes and hospitals, in particular, stand to benefit from this thermostat, which is the most ergonomic and safest unit of its kind in the Grohe range. Where safety, quality and comfort are at a premium, Grotherm Special definitely delivers.

Grotherm Special is a modern thermostat, which offers a range of specific features for care home operators and residents. Grohe Quickfix technology's innovative installation system makes it easy to remove the thermostat from the wall in order to inspect, and possibly replace, the back-flow stop valve. Residents also benefit from the proven Grohe CoolTouch technology, which protects users

against scalding on hot metal surfaces.

The new Grotherm Special is available for washbasins, bathtubs and showers. While the wall-mounted basin variant comes with spout lengths of 115 and 175 millimetres, the concealed variants for installation in the Rapido T Box and the on-the-wall models share the same innovative features.
